Offender1

Person 4

Offender2

Person 6

Investigation description (max. 500 characters): *Describe how you found the offenders (describe how you proceeded).*

Firstly I opened pictures of offenders on my screen, and went through database pictures, taking notes of prints that can match, then from there I started comparing every picture side by side, paying a lot of attention to patterns that I can see, for example tree places, where line splits in a row, and I compared the overall look of fingerprints to each other.
